Adjustments	Height x/y tilt diagonal tilt flush

FurnSpin

The Joy of Spin

FurnSpin synchronises two different forms of movement: swivel action as well as rotation through 180 degrees. Benefiting from perfected kinematics, FurnSpin is balanced so carefully that even the lightest objects stay firmly in place. With absolutely no doors or corners extending from the cabinet, it opens up space in a whole new way. FurnSpin will revolutionise the way you see and use your space.

For a seamless look you can conceal valuable collections or hide mess with the flick of a wrist.
